SUMMARY

AI-focused Solutions Specialist at a Microsoft Solutions Partner, engineering production-grade AI agents and intelligent automation for enterprise clients on the Microsoft stack. Specializes in agent architecture, grounded retrieval, prompt engineering, and adversarial safety testing using Microsoft Copilot Studio, Power Platform (Power Apps, Power Automate, Dataverse), and Azure DevOps-based ALM. Owns the full AI delivery lifecycle — from solution design and knowledge-grounding strategy through hallucination mitigation, UAT, and production deployment — delivering solutions built to meet enterprise governance and security requirements.

WORK EXPERIENCE

Shellsoft Technology Corporation

L2 Solution Specialist – Application and Databases | March 2026 – PRESENT

- Delivered AI agent and Power Platform solutions as part of a Microsoft Solutions Partner engagement model, designing for enterprise client governance, security, and compliance standards rather than single-org internal use.
- Led the end-to-end development of an AI-powered HR Assistant Agent in Microsoft Copilot Studio, from solution design through UAT and production deployment.
- Led authorship of the solution design documentation, risk register, and client sign-off materials for executive and stakeholder approval.
- Led design and execution of a structured UAT and evaluation framework, covering safety/jailbreak resistance, grounding, hallucination prevention, and citation traceability.
- Led implementation of an Application Lifecycle Management process using Azure DevOps source control integrated with Power Platform Pipelines across Development, Test/UAT, and Production environments.
- Led configuration of SharePoint-based knowledge source structures and governance standards to ensure accurate, secure AI agent grounding.
- Facilitated sprint reviews and stakeholder demos, tracking agent performance, credit consumption, and delivery milestones.
- Continuously developing expertise in Power Apps, Power Automate, Dataverse, and AI Builder to expand low-code/pro-code solution delivery within the Applications & Databases practice.

L2 Solution Specialist – Modern Workplace | July 2025 – March 2026

- Delivered Microsoft 365 migration, security, and training engagements across multiple enterprise client environments as part of Shellsoft's MSP service delivery.
- Led end-to-end Microsoft 365 email migration projects, including planning, tenant configuration, cutover execution, and post-migration validation.
- Led deployment and ongoing administration of Microsoft 365 Defender (MDO), including policy configuration, threat investigation, and security posture optimization.
- Conducted Administrator and End-User Training sessions to drive adoption, improve governance, and enhance security awareness.

- Served as Level 2 escalation support for Microsoft 365-related incidents, performing root cause analysis and implementing sustainable remediation.
- Managed tenant administration including Exchange Online, SharePoint Online, Teams, and Entra ID configuration and governance.
- Performed security hardening activities such as Conditional Access configuration, MFA enforcement, and baseline security review.
- Collaborated with pre-sales and project teams to design and validate Microsoft 365 solution architectures aligned with client requirements.
- Continuously developing expertise in Microsoft Intune and on-premises Windows Server environments to support hybrid infrastructure scenarios.

Intern | March 2025 – June 2025

- Familiarized with Microsoft 365 productivity and core applications; assisted colleagues in the Backup Team.
- Supported in client meetings by setting up schedules, taking notes, and following up on action items.
- Prepared and presented mock and live presentations for clients.
- Handled technical troubleshooting, responded to client queries via email and in meetings.
- Collaborated with cross-functional teams to ensure timely and quality deliverables.
- Shadowed senior staff in client-facing activities, gaining exposure to solution selling and customer engagement.

CERTIFICATION

Microsoft Certified: Identity and Access Administrator Associate (SC-300) | 2026 – 2027

Credential ID: 8CDBDF90879B7C9D

Microsoft Certified: Power Platform Functional Consultant Associate (PL-200) | 2026 – 2027

Credential ID: E798136C577EFE9

Microsoft Certified: Power Platform Developer Associate (PL-400) | 2026 – 2027

Credential ID: EC81FD601485C077

EDUCATION

Polytechnic University of the Philippines Sto. Tomas Campus | 2021 - 2025

- Bachelor of Science in Information Technology (Magna Cum Laude)

PROJECT EXPERIENCE

Yolov8 School Uniform Detection - Python

- A computer vision project leveraging YOLOv8 for automated detection and classification of school uniforms in images or video streams

Project Manager & Lead Developer, WasteLess

- Developed an AI/MLpowered mobile application to minimize food waste by repurposing it.
 - Utilized computer vision and an AI API to generate recommendations based on food scrap images.
-

ACHIEVEMENTS

Voice AI Hackathon Manila 2026

BGC, Taguig, Philippines

- **2nd Runner Up** — built Parrot AI, a product concept for job seekers in the Philippines, focused on giving them a clearer edge.
- Presented the work to judges from the Philippine tech scene during an AWS Cloud Club Philippines, Agora, and TRAE organized event.

PUP Hackathon: UtHack ang Puhunan

Polytechnic University of the Philippines – Sta. Mesa

- Led the team to research and develop a paper for the hackathon.
 - Secured a spot in the top 10 and participated in the development and business idea phases.
 - Actively participated in pitching the idea to judges and audience, securing advancement to the next phase.
 - In charge of developing the main feature of the application and providing support to team members.
-

SKILLS

Microsoft 365 & Cloud Technologies

- Microsoft 365 Administration
- Microsoft Entra ID
- Microsoft Defender for Office 365
- Email Migration
- Microsoft Intune
- Security & Compliance Configuration

Infrastructure & Systems

- Windows Server
- Azure AD Connect
- PowerShell

Power Platform & AI

- Microsoft Copilot Studio (agent design, grounding, prompt engineering)
- Power Platform Pipelines
- Dataverse fundamentals

- AI agent safety testing (jailbreak/prompt-injection resistance, hallucination mitigation)

ALM & DevOps

- Azure DevOps
- Application Lifecycle Management

Client & Project Delivery

- Technical Troubleshooting & L2 Escalation Handling
- Root Cause Analysis & Incident Resolution
- Administrator & End-User Training Delivery
- Client-Facing Presentations & Solution Walkthroughs

- Technical Documentation & Implementation Reports

Professional Strengths

- Analytical & structured problem-solving
- Clear technical communication (technical & non-technical audiences)
- Cross-functional collaboration
- Ownership mindset in project delivery
- Continuous learning in cloud & security technologies
